

How Does Your Garden Grow?

Product of the Month

DiSC 2.0 Plus – Select Supplemental Reports i.e:

Management Reports

Approach to Managing Others

5 page report that teaches how to structure more effective interaction and improve coaching sessions with respondent.

Strategies for Managing

6 page report that helps managers build trust and uncover hidden frustrations of respondent.

It is that time of year when all homeowners take pride in their landscaping displays. As you drive down the road – take a look around – can you guess which ‘DiSC’ style fits with each landscape decor?

D – Dominance

A “D” could not be bothered by yard work. A well-maintained yard is best accomplished by an outside source. The landscape is majestic looking with low maintenance. Their desire is to hire.

i – influence

An “i” residence will have a wild flower garden with a variety of lilies, iris’ and tulips. No specific order – many colors and types. A tiki hut on the backyard deck is a must for summer entertaining.

C – Conscientious

“C’s” will test their soil and research which plants/trees grow best in the existing conditions and climate. They will also have a very balanced and logistic layout. Yard will look perfect – not a weed in sight!

S – Steadiness

The “S” landscape is filled with the standard favorites. They will plant the same flowers in the same places each year. The organized garden is symmetric and color specific. The hanging baskets will coordinate with the garden display. A wind chime is hanging to provide a calming sound.
